

Individual Reflection – Alec Nonnemaker (4953282)

For this project, I created a world choropleth map to display various statistics for each country, such as the number of powerlifters that have competed and each countries strongest lifts. I was also responsible for merging all of the different parts of the project together and doing the final styling.

Overall, I think the project was a success. The visualization we created are visually appealing and provide valuable information to users. I enjoyed working on the project and learned a lot about data visualization and web development. One of the challenges I faced during the project was ensuring that everything was properly aligned and displayed correctly. I have some experience with web design but this was a while ago so I had to refresh my memory on some parts. I spent some time debugging and testing to make sure everything was working as expected.

I think our group worked well together and we were able to complete the project in a timely manner. This project was a great learning experience and will help me a lot in future projects and work in the fields I am interested in.
